Live Try-On

Shoppers can't try clothes online, so they guess wrong and send them back. We let them see themselves wearing it — live — before they buy.

01 PROBLEM STATEMENT

Shoppers can't try clothes online, so they send them back

No way to try before buying

Size charts differ from brand to brand, so shoppers have to guess.

Buy two, return one

Many order two sizes or colours and send one back.

Shops lose sales and money

Unsure shoppers leave the cart. Every return costs shipping and repacking.

Up to 40%

of clothes bought online in India are sent back

#1 reason: wrong size or fit

Sources: NIFT (2025); Electronic Commerce Research (2020)

TARGET USERS

- Online clothes shoppers
- Clothing brands & Shopify shops
- Local boutiques & artisans

02 SOLUTION

A live trial room that works inside any clothing shop

Hover a product photo, click Try On, and see yourself wearing it on your webcam — live, in a few seconds.

1

Click Try On

A Try On button appears on clothing photos in the shop.

2

Allow the camera

Video is never saved. It stays private.

3

See it on you, live

Move, turn, and switch to another item in one click.

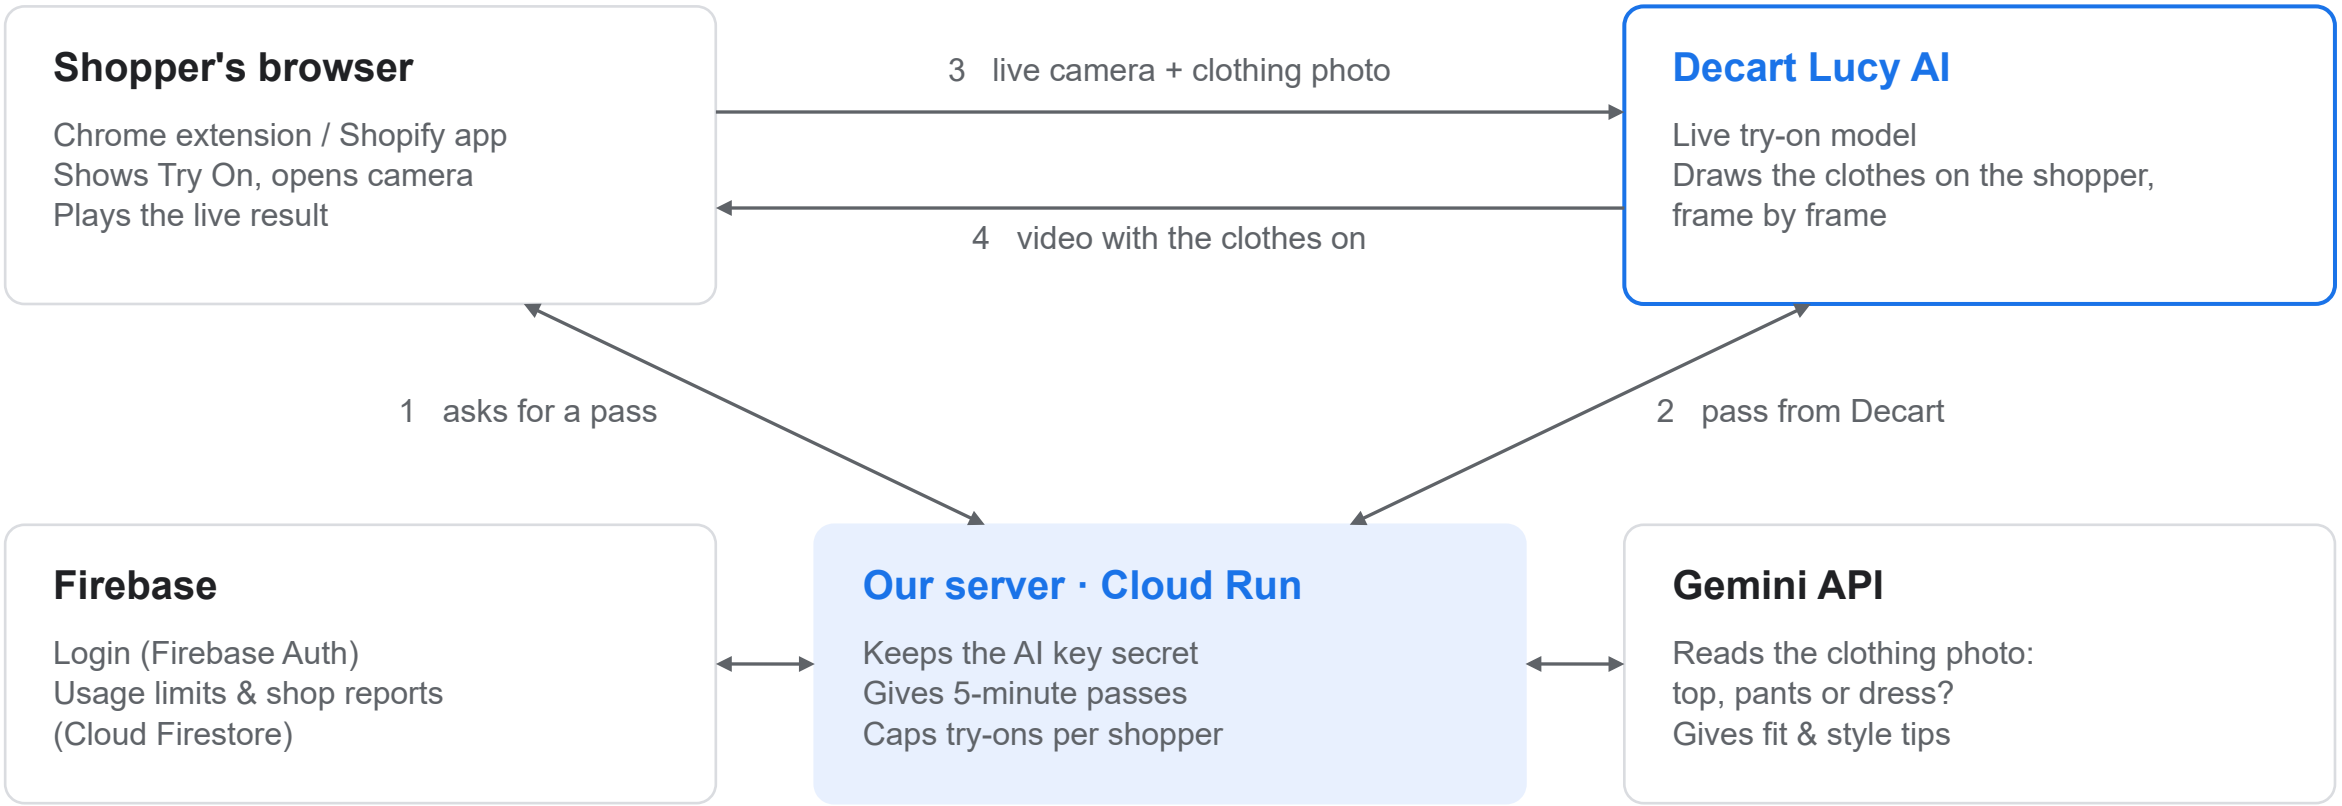

KEY FEATURES

- Works as a Chrome extension and a Shopify app
- Finds the right product photo by itself
- Stops when idle, so AI cost stays low
- Add to cart straight from the try-on window

Built with Google

Gemini reads the clothing photo (top, pants, dress)
Cloud Run hosts our secure server
Firebase handles login and usage limits
Vertex AI trains our own model (Phase 2)

How it works behind the scenes

Our server never touches the video. It only hands out short passes — so the secret key stays safe and AI cost stays capped.

04 TECH STACK

A simple stack, built mostly on Google

FRONTEND

Chrome Extension (MV3)

JavaScript + esbuild

Webcam via WebRTC

BACKEND

Node.js + Express

Google Cloud Run

AI

Decart Lucy AI

Gemini API

Vertex AI (Phase 2)

DATA & AUTH

Firebase Auth

Cloud Firestore

Short-lived API passes

DEPLOY

Google Cloud Run

Chrome Web Store

Shopify App Store

Blue = Google technology

05 PROTOTYPE & PLAN

Already working today — here's the 2-day plan

DONE

- Live try-on works on Zara, H&M, Myntra and Shopify shops
- Result appears in a few seconds
- Secure pass server with usage limits
- Auto-stop to save AI cost

AT THE HACKATHON

- Move server to Google Cloud Run
- Gemini auto-detects the item type
- Firebase login + shop dashboard
- Shopify app + ethnic-wear demo

NEXT

- Launch on the Shopify App Store
- Pilot with Udaipur boutiques
- Own AI model on Vertex AI to cut cost

Shops pay monthly — and every plan makes a profit

₹53

AI cost of one 30-second try-on

40–52%

profit on every plan, even if a shop uses all its minutes

Starter

$149 /mo

≈ ₹13,100

120 try-ons / month

Small Shopify shops

Growth

$449 /mo

≈ ₹39,500

400 try-ons / month

Main focus

Business

$1,199 /mo

≈ ₹1,05,500

1,200 try-ons / month

Big & foreign brands

Free trial: 4 try-ons · Extra minute: $2.50 (our cost $1.20) · Enterprise: custom · Shoppers' extension pack: $19.99

07 IMPACT & SCALABILITY

Fewer returns, more sales, less waste

Fewer returns

Shoppers see the fit first, so fewer parcels come back.

Less waste

Fewer return trips mean less fuel and packaging.

Built to scale

Our server only gives passes. The heavy AI work scales on its own.

UDAIPUR

Local boutiques and artisans put bandhani, leheriya and block-print online — buyers try before they buy.

RAJASTHAN

Handloom and craft sellers in Jaipur, Jodhpur and Barmer reach buyers across India.

INDIA

Any clothing brand on Shopify or its own website — then global.

Thank you

Live Try-On — try it on before you buy it.
